The authors regret that a chemical compound was incorrectly named as *sodium persulfate*, which was not used. The compound is named in Section 2.1 (Materials), where it appears in the list of chemicals, in Section 2.2 (Gel formulation), where it is described as “2.5 mg of sodium

persulfate...”, and in Table S1 (List of used chemicals) in the Supplementary Information. The correct name of the chemical used in the analysis is *sodium metabisulfite*.

The authors would like to apologise for any inconvenience caused.
